

ASSESSMENT GUIDE

Unit Code: ITEC630 IT Masters Project Part A (Project Management), Semester 1, 2026

Assessment 3 – Project Proposal Presentation

Assessment Artefact: Assessor generated summary as per rubric

Weighting [30%]

Why this assessment?

- Allows students to apply their knowledge and technical skills as well as their project management and communication skills at higher levels.
- Helps students monitor and review their progress of their project.

What are the types of employability skills that I will acquire upon completion of this assessment?

Skill Type	
Developed critical and analytical thinking	☒
Developed ability to solve complex problems	☒
Developed ability to work effectively with others	☒
Developed confidence to learn independently	☐
Developed written communication skills	☐
Developed spoken communication skills	☒
Developed knowledge in the field study	☐
Developed work-related knowledge and skills	☐

Assessment Overview:

Purpose, as written in the EUO

Due date:	12pm, 25 th May 2025 (Slides) and 12PM – 3PM, 29 th May 2025 (Report)
Weighting:	30%
Length and/or format:	Up to 30 minutes including questions
Learning outcomes assessed	LO4
Graduate attributes assessed	GA5, GA10
How to submit:	Uploading slides onto Canvas and live presentation in class
Return of assignment:	Feedback will be provided in class and through Canvas using rubrics after one week
Assessment criteria:	Rubric: see end of document

Context

This assessment provides students with an opportunity to formally present their software development progress to date, critically reflect on their project journey thus far, and outline a detailed plan for the remaining stages of their capstone project. This task is designed to promote reflection on both the technical and project management aspects of the work, encourage students to evaluate the effectiveness of their approach, and adjust their planning for the final phases accordingly. It also enables students to receive constructive feedback at a critical midpoint in the project lifecycle.

Instructions

Students are required to deliver an oral presentation of up to 30 minutes, comprising 25 minutes of presentation and 5 minutes for questions and discussion.

- **Presentation slides** must be submitted to Canvas by the due date indicated above.
- **Live presentations** will be scheduled during weekly sessions as per the class timetable.

Each presentation should be structured around the following key components:

Part A: System Progress Demonstration and Reporting

- **Live demonstration** of the latest working version of the system (where available).
- The demonstration must clearly identify:
 - The currently implemented features.
 - The number of releases and development sprints completed.
 - Any iterative development or sprint reviews undertaken?
- **If a working system is not yet available**, students must:
 - Provide a comprehensive report on progress to date.
 - Present the updated product backlog.
 - Include detailed agile planning documentation (e.g., sprint planning, sprint backlog).
 - Present updated software design models (process models, interaction diagrams, use case models, behaviour models, and user interface designs).
 - Justify any delays or obstacles that have prevented delivery of a working increment, with clear articulation of how these challenges are being addressed.
 - Support your reporting with **JIRA artifacts and documentation**, as demonstrated during lectures.

Part B: Implementation, Testing, and Deployment Plan

This section should present your detailed plan for the next stages of the project, including:

- **Implementation Plan:**
 - Technology stack and tools to be used.
 - Development environments and collaborative tools.
 - UML class diagrams representing the system architecture.
 - Source code version control strategies (e.g., Git workflows).
 - Team development approaches (e.g., pair programming, code reviews).
- **Testing Plan:**
 - Testing strategies (unit, integration, system, user acceptance testing).
 - Testing techniques and tools to be applied.
 - Test data management and reporting processes.
- **Deployment Plan:**
 - Deployment strategies (e.g., cloud, on-premise, hybrid).
 - Deployment environments and tools.
 - Update and release management processes.
 - Considerations for rollback and contingency planning.

Part C: Team Reflection on Project Journey (Midpoint Review)

This section should provide a critical reflection on your team's experience during the first half of the project, including:

- **Achievements:**
 - Key deliverables and progress made.
 - Milestones achieved to date.
- **Teamwork Experience:**
 - Collaboration and coordination approaches.
 - Individual contributions and responsibilities.
- **Lessons Learned:**
 - Practices that worked well and recommendations for others.
 - Challenges encountered and how they might be addressed differently.
- **Skills Development:**
 - Skills acquired by the team and individual members.
 - Reflection on skill levels against the **SFIA (Skills Framework for the Information Age)** competency levels.
 - Refer to the SFIA framework here: [SFIA Skills Framework](#).

Peer Assessment Requirement

As with Assessments 1 and 2, the **Peer Assessment Form** must be completed by all team members. This form is essential for ensuring fair and transparent evaluation of individual contributions and will be used as part of the overall assessment.

Structure

Refer to the rubric for details of mark distribution

How do I submit?

- Presentation slides in Canvas
- Live presentation – during weekly session (in-person)

Criteria

The full criteria are compiled in a rubric, which can be found on the following page.

Rubric for Assessment 2 – Project Proposal Presentation (30%)

Learning Outcomes	Criteria	Standards				
		Below Expectations	Meets expectations		Exceeds Expectations	
		NN (0-49)	PA (50-64)	CR (65-74)	DI (75-84)	HD (85-100)
GA10 LO4 Weight=10 marks TL=5 Learning stage=A	Demonstrate a working Peer Review of Assessment Guides Workflow Management System	Fail to adequately demonstrate a working Peer Review of Assessment Guides Workflow Management System	Adequately demonstrate a working Peer Review of Assessment Guides Workflow Management System	Credibly demonstrate a working Peer Review of Assessment Guides Workflow Management System	Distinctively demonstrate a working Peer Review of Assessment Guides Workflow Management System	Highly distinctively demonstrate a working Peer Review of Assessment Guides Workflow Management System
GA5 LO4 Weight=20 marks TL=5 Learning stage=A	Develop and effectively deliver a clear and coherent oral presentation following the provided instructions	Fail to adequately develop and effectively deliver a clear and coherent oral presentation following the provided instructions	Adequately develop and effectively deliver a clear and coherent oral presentation following the provided instructions	Credibly develop and effectively deliver a clear and coherent oral presentation following the provided instructions	Distinctively develop and effectively deliver a clear and coherent oral presentation following the provided instructions	Highly distinctively develop and effectively deliver a clear and coherent oral presentation following the provided instructions
